

KARTHIK IYER

Washington, DC, USA | karthikiyer365@gmail.com | +1 (202) 713-1699 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI & Data Engineer with 2+ years building scalable ETL pipelines, LLM/Agentic AI frameworks, and BI dashboards across multi-system enterprise environments. Skilled in Python, SQL, data modeling, and MLOps — transforming cross-source datasets into clean, governed inputs that power predictive analytics, risk prioritization, and self-service reporting.

EDUCATION

George Washington University | **M.S. in Data Analytics (GPA 3.68/4.00)** Washington, DC | May 2025
University of Mumbai | **B.E. in Computer Engineering (GPA 3.50/4.00)** Mumbai, India | May 2022

SKILLS

Languages & Data Python (Pandas, NumPy, Scikit-learn), SQL, MongoDB, Supabase, MySQL, Node.js.
Data Engineering ETL Pipelines, Data Modeling, Schema Design, REST API Integration, Data Validation, MLOps, CI/CD.
AI / ML LLMs, RAG, MCP / Agentic AI, XGBoost, Random Forest, Time Series Forecasting, Predictive Modeling.
Cloud & BI Databricks, Spark, Azure (ADF, Blob), Google Vertex AI, (S3,), AWS (S3, EC2), Tableau, Power BI, Excel.

WORK EXPERIENCE

RestoreFast Operations LLC North Bethesda, MD, USA
June 2025 – Present

- Data Systems Engineer** | AI & ETL Developer
- Built v1 of a **Agentic profile-recommendation service** through multistep Agentic flows for project requirement based identification, evaluation and selection, across 5 dimensions (DS-CAR) and integrated communication channels.
 - Integrated 5+ third-party platforms (Gmail, Drive, Nutshell, Xero, Twilio) into a unified **internal data layer via custom MCP tools**, RAG connectors, and REST services.
 - Built the **ingestion and retrieval layer for an internal AI** knowledge platform spanning 3 connected Agentic, RAG, and MCP setups, on Pinecone with custom schema design.
 - Productionized a 24/7 **LLM-backed hotline agent** for tier-1 client call triage, reducing routine escalations ~60% on a queued audio-processing backend with Twilio.
 - Developed a **central communications layer**, routing events from 15+ internal tools to SMS, Voice, and Email channels through a containerized Twilio integration.
 - Initialized a **central compliance document hub** unblocking project and worker requirement checks across 5+ active projects, with expiration tracking and attachment references on Supabase + S3.

George Washington University Washington, DC, USA
August 2024 - May 2025

- Technical Systems Admin** | Software Support
- Conducted inventory audits and supported demand forecasting using BMC Helix, ensuring resource allocation and procurement.
 - Built **feedback dashboards tracking usage and sentiment** across 10+ academic tools on Mac, Linux, and Windows, driving 90%+ user satisfaction through data-informed support.
 - Analyzed support ticket trends and operational data to **identify system bottlenecks**, contributing to a 97% issue resolution rate and improving team response workflows.

- Teaching Assistant** | Decision Making & Data Analytics September 2024 – December 2024
- Ran weekly 3-hour student support sessions **translating probabilistic and data-analytics concepts** into applied examples for a multi-section graduate cohort.
 - Built an auto-grading pipeline for 400+ assignments using Python, NLP, and BERT, cutting evaluation time ~60% and saving faculty ~10 hours per week.
 - Refined the grading algorithm with 3 faculty members over the term, lifting scoring consistency and plagiarism detection.

DPSY & Associates Mumbai, India
April 2023 – June 2023

- Financial Analytics Intern**
- Automated **CRM data reconciliation** with SQL and Python (Pandas, NumPy), filtering 80% of routine records to surface high-risk cases and cut audit cycles from 2 to 1.5 months.
 - Delivered 10+ stakeholder-ready Tableau dashboards and decks for 3 finance clients, enabling them to pinpoint stocking levels and ROI thresholds.
